

RESIDENTIAL RECYCLED WATER FILL STATION USER APPLICATION AND AGREEMENT

CERTIFICATION STATEMENT, INDEMNITY AND SIGNATURE

This Agreement shall become effective upon execution by you and LADWP, and shall terminate one year thereafter or, if earlier, at the end of the Residential Recycled Water Fill Station Pilot Program. LADWP may terminate this Agreement sooner if you fail to comply with the conditions of this agreement or LADWP's requirements for recycled water. This Agreement shall be governed by the laws of the State of California and the City of Los Angeles without regard to conflict of law principles. All litigation arising out of or relating to this Agreement shall be brought in a State or Federal court in the County of Los Angeles.

By checking this box, I certify I have read and understand all conditions in this Agreement and in the form entitled, Things to Know About the Use of Recycled Water (incorporated herein), and agree to comply with these conditions and to conform to all LADWP requirements for recycled water use. Further, I understand that my failure to comply with the conditions of this Agreement may lead LADWP to bar me from participating in the Residential Recycled Water Fill Station Pilot Program. I authorize LADWP and LASAN to perform inspections as needed to ensure proper use of recycled water and to ensure the health and safety of my household and the public.

By checking this box, I hereby agree to indemnify, defend and hold harmless, the City of Los Angeles (City), its departments and divisions (including, without limitation, LADWP and LASAN) and all of their boards, officers, employees, agents, representatives and assigns (Indemnitees) and, at the option of the City, defend the Indemnitees from and against any and all suits, causes of action, claims, charges, damages, demands, judgments, fines, penalties or losses of any kind or nature whatsoever (collectively, Claims) for death, bodily injury or personal injury to any person, or damage or destruction to my property or any property of the City, its departments or divisions (including, without limitation, LADWP and LASAN) or any third person, in any manner arising by reason of my participation in the Residential Recycled Water Fill Station Pilot Program including, without limitation, Claims related to harm caused or incurred by my picking up or transporting recycled water, the use of recycled water or contact with recycled water, whether the harm occurs to me, my officers, agents, employees, invitees or patrons or to third parties, regardless of their status on the property, and regardless of whether I knew of, or in the exercise of due diligence, could have known or foreseen the likelihood of the particular harm. The foregoing release, hold harmless, and indemnity shall not apply to Claims arising or resulting from the sole negligence or the willful misconduct of the City, its departments, or its divisions. This paragraph shall survive expiration or termination of this Agreement.

RECYCLED WATER
Local | Safe | Reliable

CITY OF LOS ANGELES

RESIDENTIAL RECYCLED WATER FILL STATION PROGRAM

The City of Los Angeles now offers free recycled water to all Los Angeles Department of Water and Power (LADWP) customers. You can now get disinfected recycled water for approved purposes, free of charge. Just bring your water containers with water-tight lids to the Recycled Water Fill Station.

Locations and Hours

Delano Park

15100 Erwin Street, Van Nuys, CA 91141
Open every Thursday from 8 a.m. to 2 p.m.

Los Angeles Zoo Parking Lot

5333 Zoo Drive Los Angeles, CA 90027
Open every Friday from 8 a.m. to 2 p.m.

Locations closed on rainy days and holidays.
Check ladwp.com/rwfs for updates.

Recycled water helps promote conservation by offsetting demand for precious drinking water. You may use recycled water only for landscaping purposes such as maintaining trees, shrubs, gardens and lawns.

To be eligible to receive free recycled water at the fill station, customers must complete a brief training class before filling up. Upon completion, participants can receive up to 300 gallons of disinfected tertiary recycled water per visit.

To receive recycled water, you must:

- Be an LADWP customer. Bring your LADWP bill and a government-issued photo ID to the Recycled Water Fill Station training for verification.
- Take the Recycled Water Fill Station training provided by LADWP.
 - Training is free and will be conducted at the Fill Station.
 - Please RSVP via email at recycledwaterinfo@ladwp.com.
- Submit a signed Recycled Water User Application and Agreement form.
- Place the provided “Do Not Drink” purple stickers on ALL containers used for transporting recycled water.
- Bring your own water-tight lid containers to the fill station. All containers will be checked for proper labeling. You must carry and maneuver your containers; LADWP personnel will not help load or carry any containers.

For more information, visit ladwp.com/rwfs or email recycledwaterinfo@ladwp.com.

THINGS TO KNOW ABOUT THE USE OF RECYCLED WATER

1. What is recycled water and is it safe?

Recycled water is wastewater that has been processed through primary, secondary and tertiary treatment and disinfected with chlorine. It meets the strict standards and safety regulations of the State Water Resources Control Board and is safe for all human contact except drinking.

2. What are the permitted uses of recycled water?

Based on requirements set forth in Title 22 of the California Code of Regulations, tertiary-treated recycled water can be used to water lawns, gardens, trees, edible fruits, vegetables, and herbs. However, all fruits, vegetables, and herbs must be washed with drinking water prior to consumption. Recycled water tends to have a higher salt content than drinking water, so it's best to direct the recycled water to the roots of the plants and not the foliage. This will protect them from potential leaf burn.

3. What are prohibited uses of recycled water?

- Drinking
- Cooking or use in the kitchen
- Bathing or showering
- Filling swimming pools or spas
- Children's water toys
- Discharging to the street gutter or storm drain system
- Plumbing to a household domestic plumbing system

4. Why is recycled water not safe to drink? What happens if I drink it?

Recycled water is not approved for drinking. However, it is treated to an extremely high standard and accidental consumption is not likely to make you ill. If you accidentally drink recycled water, there is no need to panic. Should you experience any adverse symptoms or feel unwell, consult your doctor.

5. How much will recycled water cost me?

LADWP is offering this service at no cost to its residential and commercial customers during the Residential Recycled Water Fill Station Pilot Program.

6. How much recycled water can I pick up at a time?

Participants will be allowed to pick up a maximum of 300 gallons of recycled water, free of charge, per program operating day. Due to the heavy weight of water, plan accordingly when determining how much water to pick up and keep in mind the size of your vehicle when selecting transport containers. Ensure your vehicle can handle the amount and weight of recycled water you collect and transport. Driving a vehicle with heavy, sloshing liquid decreases vehicle stability and requires longer stopping distance. Tie-down straps to secure the containers are recommended for your safety. The City of Los Angeles, LADWP and the Los Angeles Bureau of Sanitation (LASAN)

are not liable for any damages to you or your vehicle due to your participation in the Residential Recycled Water Fill Station Pilot Program.

WATER IS HEAVY!

One gallon of water weighs 8.34 pounds.
Two 55-gallon drums of recycled water weigh 918 pounds; 300 gallons of water weigh 2,500 pounds, or 1.25 tons.

7. What are the rules and requirements for participating in the Recycled Water Fill Station Pilot Program?

- a. Prior to picking up recycled water, you must sign and turn in a user application and Agreement to LADWP staff, along with a recent LADWP bill to confirm eligibility. You must also attend a training session provided by LADWP on the proper uses of recycled water.
- b. Your collection and storage containers must have water-tight lids and not leak.
- c. LADWP staff will place DO NOT DRINK purple stickers on each container you use. This is to ensure that everyone is aware that recycled water is stored in the container and the water is not suitable for human consumption. Do not remove the stickers.
- d. You must secure all containers for safe transport.
- e. Containers, hoses, and other equipment shall not be re-used to carry potable water.
- f. Recycled water is not for drinking, playing with, or for use in food preparation or clean-up.
- g. Use drinking water to wash all fruits, vegetables, or other edible plants that have been watered with recycled water.
- h. DO NOT cross-connect recycled water to potable water distribution system. Recycled water shall not be placed in a storage container that is connected to the landscape irrigation system or the onsite drinking water supply.
- i. Recycled water shall not be discharged to the street gutter or storm drain system and must not be applied in such a way to create runoff or ponding.
- j. Recycled water shall not be applied where it could spray on external drinking water fountains, passing vehicles, buildings, or areas where food is handled or eaten.
- k. Recycled water obtained from the Residential Recycled Water Fill Station Pilot Program must be applied by hand watering only.
- l. Practice good sanitation habits. Wash hands with drinking water after using recycled water, especially before eating or smoking.
- m. LADWP and LASAN may conduct site visits to ensure your proper use of recycled water and to ensure the health and safety of you, your household, business, and the public.
